

Ayushi Diyora

Full Stack Developer (MERN)

As a **MERN Stack Developer** with over **3 years of experience**, I build full-stack web applications that are fast, scalable, and user-friendly. I work with **React.js**, **Next.js**, **Tailwind CSS**, **Node.js**, and **MongoDB**. My projects range from job platforms to admin dashboards and social apps. I focus on clean code, secure APIs, and modern UI/UX practices.

PROFESSIONAL EXPERIENCE

Front-End Developer

April 2022 - Present

CodeAlchemy Pvt Ltd | Surat

- Designed and developed responsive web apps including dashboards, document portals, and social platforms.
- Collaborated with cross-functional teams to build pixel-perfect UIs and ensure seamless backend integration.
- Ensured high code quality through testing, reviews, and performance tuning.

EDUCATION

Bachelor of Computer Application (BCA)

Swarnim Startup & Innovation University
2020 - 2023

SKILLS

Frontend: React.js, Next.js, Redux Toolkit, TailwindCSS, Material UI

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT

Database: MongoDB, Firebase, Supabase, MongoDB

Tools: Git, Postman, Vercel, Render

Languages: JavaScript, TypeScript

PROJECT EXPERIENCE

CertifyRecruit

React, MongoDB, Mongoose

- A LinkedIn-style platform for job postings, hiring, certification management, and secure payments using PhonePe API.

BPA (Book & Periodical Agency)

React, Material UI

- An admin dashboard for managing e-commerce operations, order tracking, customer support, and service returns.

Social Media Backend System

Node.js, Express.js, MySQL

- A backend solution with user authentication and database optimization for a social media platform.

Mapsted Operation-tool (Map Operation System)

React.js, OpenLayers, Context API, Semantic UI

- Built a geospatial dashboard to visualize complex hardware data using OpenLayers.
- Consumed real-time APIs provided by the backend team to fetch sensor status, accurately plotting
- Node Points and Boost Tags on the map.
- Implemented dynamic floor-level detection and seamless transitions between building floors based
- on API data.
- Developed Geofencing visualization tools, rendering digital boundaries on the map from coordinate data.
